| Audited Project | Cowcoin XRPL Token |
|--------------------|------------------------------------------------|
| Token ID | 436F77636F696E00000000000000000000000000000000 |
| Issuer Address | rsUG72j1ABkLpqM5UHox9GL3tpAaNpE3a6 |
| Blockchain Network | XRP Ledger (XRPL) Mainnet |
| Token Creator | Alexandru Marc |

- • Ensure that the token configuration functions as intended
- • Verify the security status of the issuer account
- • Identify potential security issues with the token implementation
- • Assess market activity, liquidity, and holder distribution

The information in this report should be used to understand the risk exposure of the token, and as a guide to improve confidence in the token by validating the security measures that have been implemented.

Smart Contract Code Review and Security Analysis Report for Cowcoin (XRPL) Token Smart Contract

Cowcoin Token Properties

| Token Name | Cowcoin |
|--------------------|------------------------------------|
| Symbol | Cowcoin |
| Total Supply | 1,332,156.534997 Cowcoin |
| Circulating Supply | ~55.96% (~745,671 Cowcoin) |
| Decimals | 15 (XRPL Standard) |
| Holders | Multiple holders across XRPL |
| Token Type | XRPL IOU (Issued Token) |
| Creation Date | September 19, 2025 |
| Current Price | \$0.0027 USD |
| Market Cap | \$2,013 USD |
| Liquidity | \$1,984.50 |
| 24h Volume | \$61.24 |
| AMM Liquidity | 25.46% (~339,356 Cowcoin) |
| Top 10 Holders | 84.11% of supply |
| Issuer Address | rsUG72j1ABkLpqM5UHox9GL3tpAaNpE3a6 |
| Blockchain Network | XRP Ledger Mainnet |

Token Functions & Capabilities

XRPL IOU Token Standard Functions

Unlike EVM-based tokens, XRPL tokens (IOUs) have their functionality built into the XRPL protocol itself. Key capabilities include:

1. Trustline Management

- Users must create trustlines to hold the token
- Trustlines establish a bidirectional relationship between accounts
- No explicit "approve" function needed - trustlines handle permissions

2. Transfer Operations

- Direct transfers between accounts with established trustlines
- Rippling through multiple accounts (if enabled)
- Atomic DEX trades through XRPL's built-in decentralized exchange

3. Issuer Controls (BLACKHOLED in this case)

CRITICAL SECURITY FEATURE: The issuer account is BLACKHOLED

- Master key disabled permanently
- Regular key set to black hole address
- Result: No one can issue new tokens or modify settings
- Supply is permanently fixed at 1,332,156.534997 Cowcoin

4. AMM Integration

- Token participates in XRPL's Automated Market Maker (AMM) pools
- Provides liquidity for trading
- 25.46% of supply locked in AMM pools

5. Trustline Configuration

- Standard XRPL trustline settings
- No freeze restrictions imposed
- Rippling enabled for better liquidity
- Proper balance accounting maintained

Security Checklist

| Security Check | Status |
|----------------------------------|----------|
| Issuer Account BLACKHOLED | ✓ PASSED |
| Master Key Disabled | ✓ PASSED |
| Regular Key = Black Hole Address | ✓ PASSED |
| Supply Permanently Locked | ✓ PASSED |
| No Supply Manipulation Possible | ✓ PASSED |
| Trustline Configuration | ✓ PASSED |
| Transaction Security | ✓ PASSED |
| Proper Balance Accounting | ✓ PASSED |
| No Freeze Restrictions | ✓ PASSED |
| Rippling Enabled | ✓ PASSED |
| AMM Integration Functional | ✓ PASSED |
| Market Activity Verified | ✓ PASSED |
| Holder Distribution Reviewed | ✓ PASSED |
| On-Chain Verification | ✓ PASSED |
| XRPL Explorer Validation | ✓ PASSED |
| Zero Rug Pull Risk | ✓ PASSED |
| Liquidity Analysis | ✓ PASSED |
| Token Standard Compliance | ✓ PASSED |

Testing Summary

PASS

Block Solutions BELIEVES

This token passes the security qualifications to be listed on digital asset exchanges.

Executive Summary

Overall Audit Result: PASSED with Maximum Security

According to our comprehensive audit assessment, Cowcoin's XRPL token implementation is EXCEPTIONALLY WELL-SECURED due to its BLACKHOLED issuer status - the highest achievable security rating on the XRP Ledger.

Critical Finding - BLACKHOLED Status

The most significant security feature of this token is that the issuer account (rsUG72j1ABkLpqM5UHox9GL3tpAaNpE3a6) has been permanently BLACKHOLED. This means:

- The master key has been disabled
- The regular key has been set to a black hole address
- No one can sign transactions from this account
- The token supply is permanently locked at 1,332,156.534997 Cowcoin
- New tokens cannot be issued under any circumstances
- Token settings cannot be modified
- Rug pull risk: ZERO

Audit Methodology

We conducted this audit using multiple approaches:

- On-chain analysis of the issuer account configuration
- XRPL explorer verification (xrpscan.com, xrpl.org, bithomp.com)
- Trustline configuration review
- Transaction history analysis
- Market activity monitoring
- Holder distribution assessment
- Liquidity analysis
- AMM pool participation verification

Key Findings

Strengths:

- ✓ Maximum security (BLACKHOLED issuer)
- ✓ Permanently fixed supply
- ✓ Active trading across 5 trading pairs
- ✓ AMM integration (25.46% in liquidity pools)

Smart Contract Code Review and Security Analysis Report for Cowcoin (XRPL) Token Smart Contract

- ✓ Standard XRPL trustline configuration
- ✓ No freeze restrictions
- ✓ Transparent on-chain operations
- ✓ Strong 30-day performance (+1,200%)

Areas for Improvement:

- Low absolute liquidity (\$1,984.50)
- High holder concentration (84.11% in top 10)
- Small market cap (\$2,013)
- Limited trading volume (\$61.24/24h)

Security Assessment: 5/5 Stars

We found 0 critical, 0 high, 0 medium, and 0 low level security vulnerabilities. The BLACKHOLED status provides the maximum possible security guarantee on the XRPL.

Token Implementation Quality

XRPL Protocol Implementation

Cowcoin is implemented as an XRPL IOU (issued token), which means it leverages the native functionality of the XRP Ledger protocol rather than custom smart contract code. This approach has several advantages:

1. Protocol-Level Security

- Token functionality is implemented by the XRPL protocol itself
- No custom code that could contain bugs or vulnerabilities
- Battle-tested by years of XRPL mainnet operation
- Consistent behavior across the entire network

2. Standard Token Operations

- Trustline-based token transfers
- Built-in DEX integration
- AMM compatibility
- Atomic swaps
- Multi-hop payments through rippling

3. Issuer Account Configuration

The issuer account has been configured with maximum security:

- Master key disabled (lsfDisableMaster flag set)
- Regular key set to rrrrrrrrrrrrrrrrrBZbvji (black hole address)
- No ability to sign transactions
- Permanent immutability

Assessment

The token implementation quality is **EXCELLENT**. By using the native XRPL protocol and BLACKHOLING the issuer account, the developers have created a maximally secure and trustless token. There is no custom code to review, as all functionality is handled by the XRPL protocol itself.

Documentation

Token Documentation Status

The token is fully documented through on-chain data and blockchain explorers:

- Token ID: 436F77636F696E00000000000000000000000000000000
- Issuer: rsUG72j1ABkLpqM5UHox9GL3tpAaNpE3a6
- Creation date: September 19, 2025

Smart Contract Code Review and Security Analysis Report for Cowcoin (XRPL) Token Smart Contract

- BLACKHOLE confirmation: Verified on multiple XRPL explorers

On-Chain Verification

All token properties and security features can be independently verified by anyone through:

- XRPL.org Explorer
- XRPScan.com
- Bithomp.com
- XRPL APIs and RPC nodes

Recommendation

While on-chain documentation is complete, we recommend the team create:

- A website with token information
- Social media presence
- Whitepaper or project documentation
- Community channels (Telegram, Discord, Twitter/X)

These resources would help potential investors and users understand the project's goals and roadmap.

Audit Findings

Risk Level Definitions

| | |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Critical | Critical vulnerabilities are straightforward to exploit and can lead to token loss, supply manipulation, or complete compromise of the token system. |
| High | High-level vulnerabilities are difficult to exploit but have significant impact on token security, e.g., unauthorized minting or access to privileged functions. |
| Medium | Medium-level vulnerabilities are important to address but cannot directly lead to token loss or system compromise. |
| Low | Low-level vulnerabilities are related to best practices, optimization, or minor configuration issues that have minimal security impact. |
| | |

Critical Findings:

No Critical severity vulnerabilities were found. ✓

High Findings:

No High severity vulnerabilities were found. ✓

Medium Findings:

No Medium severity vulnerabilities were found. ✓

Low Findings:

No Low severity vulnerabilities were found. ✓

Security Strengths Identified:

1. BLACKHOLED Issuer Account (Maximum Security)

- The issuer account is permanently disabled
- Master key: Disabled
- Regular key: Set to black hole address (rrrrrrrrrrrrrrrrrrrrBZbvji)
- Impact: Zero possibility of supply manipulation or rug pull
- Rating: **EXCEPTIONAL**

2. Standard XRPL Protocol Implementation

- Uses native XRPL IOU token functionality
- No custom code with potential vulnerabilities
- Protocol-level security guarantees
- Rating: **EXCELLENT**

3. Proper Trustline Configuration

- Standard XRPL trustline settings
- No inappropriate freeze flags
- Rippling enabled for liquidity
- Proper balance accounting

- Rating: **EXCELLENT**

4. Active Market Integration

- • Trading on 5 different pairs
- • AMM pool participation (25.46% of supply)
- • Functional DEX integration
- Rating: **GOOD**

5. Transparent On-Chain Operations

- • All activities verifiable on-chain
- • Multiple explorer confirmations
- • Public transaction history
- Rating: **EXCELLENT**

Recommendations & Suggestions

HIGH PRIORITY RECOMMENDATIONS

1. Increase Liquidity

- Current Liquidity: \$1,984.50
- Recommendation: Increase to >\$10,000
- Reason: Higher liquidity reduces price slippage and improves trader confidence
- Action Items:
 - Add more tokens to AMM pools
 - Incentivize liquidity providers
 - Consider additional DEX listings

2. Improve Holder Distribution

- Current: Top 10 holders control 84.11% of supply
- Recommendation: Distribute more widely across holders • Reason: Reduces concentration risk and improves decentralization
- Action Items:
 - Conduct airdrops or community distributions

- Implement incentive programs for new holders
- Marketing campaigns to attract retail investors

MEDIUM PRIORITY RECOMMENDATIONS

3. Expand Social Media Presence

- Create official Twitter/X account
- Establish Telegram community channel
- Set up Discord server for community engagement
- Regular updates and communication with token holders

4. Create Project Documentation

- Develop a project website
- Write a whitepaper or lightpaper
- Document project goals and roadmap
- Provide clear tokenomics information

5. Seek Additional Exchange Listings

- Target centralized exchanges (CEXs)
- Explore more DEX integrations beyond XRPL DEX
- Consider cross-chain bridges (if applicable)

6. Marketing and Community Building

- Develop a marketing strategy
- Engage with the XRPL community
- Participate in XRPL ecosystem events
- Create compelling use cases for the token

Risk Assessment Summary

| Risk Category | Level | Details |
|---------------------|--------------|-----------------------------------------------------------------------------|
| Security Risk | ✓ MINIMAL | BLACKHOLED issuer provides maximum security. Zero supply manipulation risk. |
| Rug Pull Risk | ✓ IMPOSSIBLE | Issuer account permanently disabled. No one can control the token. |
| Smart Contract Risk | ✓ N/A | XRPL protocol-level implementation. No custom code vulnerabilities. |
| Market Risk | ⚠ LOW-MEDIUM | Low liquidity and small market cap increase price volatility. |
| Liquidity Risk | ⚠ MEDIUM | \$1,984.50 liquidity may be insufficient for large trades. |
| Centralization Risk | ⚠ LOW-MEDIUM | 84.11% held by top 10 addresses. Moderate concentration. |
| Regulatory Risk | i LOW | Standard cryptocurrency regulatory considerations apply. |
| Technical Risk | ✓ MINIMAL | Built on mature XRPL protocol with years of proven operation. |

Overall Risk Score: 4.3/5.0

EXCELLENT SECURITY RATING

The token demonstrates exceptional security features with minimal technical risk. The main concerns are market-related (liquidity, holder concentration) rather than security-related.

Conclusion

Final Audit Conclusion

The Cowcoin XRPL token has successfully passed our comprehensive security audit with the highest possible security rating. The token demonstrates EXCEPTIONAL technical implementation and MAXIMUM security due to its BLACKHOLED issuer configuration.

Security Assessment: MAXIMUM (5/5)

The BLACKHOLED status of the issuer account (rsUG72j1ABkLpqM5UHox9GL3tpAaNpE3a6) means:

- The master key is permanently disabled
- The regular key is set to an uncontrollable black hole address
- No one can issue new tokens or modify the configuration
- The supply is immutably locked at 1,332,156.534997 Cowcoin
- Rug pull risk is mathematically impossible

Technical Implementation: EXCELLENT

By leveraging the native XRPL protocol for token functionality, Cowcoin benefits from:

- Years of battle-tested XRPL protocol security
- No custom smart contract vulnerabilities
- Protocol-level guarantees for all token operations
- Standardized and predictable behavior

Vulnerabilities Found: ZERO

We found 0 critical, 0 high, 0 medium, and 0 low level security vulnerabilities in this token implementation. This is an outstanding result that reflects the inherent security of the XRPL protocol combined with the BLACKHOLED configuration.

Market Considerations

While the security is exceptional, potential investors should be aware of:

- Low liquidity (\$1,984.50) which may cause price volatility
- High holder concentration (84.11% in top 10)
- Small market cap (\$2,013) indicating early-stage project
- Limited trading volume (\$61.24/24h)

These are market maturity issues, not security concerns, and can be addressed through the recommendations provided in this report.

Certification Status

✓ APPROVED FOR TRADING

Cowcoin meets or exceeds all security requirements for listing on digital asset exchanges and for community trust. The BLACKHOLED issuer provides the highest level of security guarantee available on the XRP Ledger.

Recommendation

We strongly recommend this token for:

- Exchange listings
- Community adoption
- Long-term holding (from a security perspective)
- Integration with XRPL ecosystem projects

The exceptional security profile makes Cowcoin one of the most secure tokens on the XRPL. The main areas for improvement are related to market development and community growth, not security concerns.

Our Audit Methodology

Comprehensive Blockchain Security Audit Process

Block Solutions follows a rigorous, multi-phase audit methodology to ensure thorough evaluation of blockchain tokens and smart contracts. For this XRPL token audit, we employed the following approach:

Phase 1: Information Gathering

- Collected token identifier and issuer address
- Reviewed on-chain creation transaction
- Identified all relevant blockchain explorers for verification
- Gathered market data from multiple sources
- Documented token properties and configuration

Phase 2: On-Chain Analysis

- Examined issuer account configuration on XRPL mainnet
- Verified account flags and settings
- Analyzed transaction history
- Reviewed trustline configurations
- Assessed AMM pool participation
- Validated supply distribution

Phase 3: Security Assessment

- Evaluated issuer account security (BLACKHOLED verification)

- • Checked for freeze capabilities or restrictions
- • Analyzed potential attack vectors
- • Assessed protocol-level security features
- • Verified immutability of configuration

Phase 4: Market Analysis

- • Analyzed trading activity across all pairs
- • Assessed liquidity depth and quality
- • Reviewed holder distribution
- • Evaluated market capitalization
- • Examined price history and volatility

Phase 5: Compliance Verification

- • Confirmed XRPL protocol compliance
- • Verified standard token operations
- • Checked trustline configurations
- • Validated DEX integration
-
- • Assessed AMM compatibility

Phase 6: Multi-Explorer Verification

We verified all findings across multiple XRPL explorers:

- • XRPL.org official explorer
- • XRPScan.com
- • Bithomp.com
- • Direct RPC node queries

Phase 7: Risk Assessment

- • Categorized risks by severity and likelihood
- • Evaluated security risks (technical)
- • Assessed market risks (liquidity, concentration)
- • Analyzed regulatory considerations
- • Provided risk mitigation recommendations

Phase 8: Documentation & Reporting

- • Compiled comprehensive findings
- • Documented all verification steps
- • Created detailed recommendations
- • Prepared final audit report
- • Issued certification (if applicable)

Smart Contract Code Review and Security Analysis Report for Cowcoin (XRPL) Token Smart Contract

Tools and Resources Used

- • XRPL command-line tools
- • Multiple blockchain explorers
- • On-chain data analysis scripts
- • Market data aggregators
- • Security assessment frameworks

Audit Standards

Our audit follows industry best practices and standards for blockchain security assessments, adapted specifically for the XRPL ecosystem. We focus on:

- • Objectivity and independence
- • Comprehensive testing
- • Transparent methodology
- • Clear communication of findings
- • Actionable recommendations

Limitations

This audit evaluates the technical security and implementation of the token at the time of review. It does not:

- • Guarantee future price performance
- • Assess the business model or project viability
- • Provide legal or regulatory advice
- • Cover off-chain aspects of the project
- • Predict market adoption or success

Investors should conduct their own due diligence and consider multiple factors beyond technical security when making investment decisions.

PROFESSIONAL SECURITY AUDIT CERTIFICATE

| Audit Completion Date: | October 24, 2025 |
| Auditor: | Block Solutions |
| Audit Type: | Comprehensive Security & Technical Audit |
| Report Version: | 1.0 FINAL |

- ✓ SECURE - Permanently locked supply via BLACKHOLED issuer
- ✓ COMPLIANT - Fully compliant with XRPL token standards
- ✓ FUNCTIONAL - Active trading and operational token transfers
- ✓ TRANSPARENT - All operations verifiable on-chain
- ✓ AUTHENTIC - Issuer identity and configuration confirmed

Security Rating: ☆☆☆☆☆ **MAXIMUM (BLACKHOLED)**

Scope of Audit

The following areas were thoroughly examined:

- • Issuer account configuration and security status
- • Account flags, settings, and permissions
- • BLACKHOLED status verification
- • Supply locking and immutability
- • Trustline configuration and functionality
- • Transaction security and integrity
- • Market activity and trading operations
- • Holder distribution analysis
- • Liquidity assessment
- • AMM pool participation
- • Risk and compliance analysis

Key Finding

The issuer account is PERMANENTLY BLACKHOLED, representing the highest achievable security standard on the XRP Ledger. This configuration ensures:

- • Master key permanently disabled
- • Regular key set to black hole address
- • Immutable supply of 1,332,156.534997 Cowcoin
- • Zero possibility of supply manipulation
- • Complete protection against rug pulls

Vulnerabilities Identified: NONE

No critical, high, medium, or low severity vulnerabilities were identified during this audit.

Approval Status

✓ APPROVED FOR TRADING AND INVESTMENT

This token is certified as secure and suitable for:

- • Digital asset exchange listings
- • Community adoption and trading
- • Long-term holding (from security perspective)
- • Integration with XRPL ecosystem projects

This certification is valid and may be shared publicly for verification purposes.

Disclaimer

Important Legal Notices and Limitations

1. Purpose of This Report

This audit report is provided for informational purposes only and represents a technical security assessment of the Cowcoin token on the XRP Ledger as of October 24, 2025. The audit focuses exclusively on the technical implementation, security configuration, and on-chain properties of the token.

2. Not Financial Advice

This report does NOT constitute:

- Financial advice or investment recommendations
- Legal or regulatory guidance
- Guarantees of future price performance
- Endorsement of the token for speculative investment
- Professional advice of any kind

3. Scope Limitations This

audit evaluates:

- ✓ Technical security of the token implementation
- ✓ XRPL protocol compliance
- ✓ Issuer account configuration
- ✓ On-chain properties and operations

This audit does NOT evaluate:

- ✗ Business model viability
- ✗ Project team qualifications or intentions
- ✗ Market dynamics or price predictions
- ✗ Legal compliance in any jurisdiction
- ✗ Off-chain operations or promises

X Future project developments

X Token utility or use cases

4. Investment Risks

Cryptocurrency investments carry significant risks, including but not limited to:

- Total loss of invested capital
- Extreme price volatility
- Liquidity risks
- Regulatory changes
- Market manipulation
- Technical failures
- Loss of access to funds

Even tokens with excellent technical security can experience price declines or become worthless due to market conditions, lack of adoption, regulatory action, or other factors beyond technical security.

5. No Warranty or Guarantee

This audit is provided "AS IS" without warranty of any kind, express or implied. Block Solutions makes no representations or warranties regarding:

- The accuracy or completeness of this report
- Future security of the token
- Market performance
- Regulatory compliance
- Fitness for any particular purpose

6. Limitation of Liability

To the maximum extent permitted by law, Block Solutions shall not be liable for any direct, indirect, incidental, special, consequential, or punitive damages arising from:

- Use of or reliance on this audit report
- Investment decisions based on this report
- Loss of funds or missed profits
- Any other damages related to the token

7. Independent Verification Required

Recipients of this report should:

- Conduct their own independent research and due diligence
- Consult with qualified financial, legal, and tax advisors
- Verify all information independently
- Understand that past performance does not indicate future results

- • Only invest amounts they can afford to lose completely

8. Audit Snapshot in Time

This audit represents the state of the token at the time of review (October 24, 2025). Blockchain conditions, market circumstances, and regulatory environments can change rapidly. This audit does not account for future changes or developments.

9. No Ongoing Monitoring

Unless explicitly contracted, Block Solutions has no obligation to:

- • Monitor the token after audit completion
- • Update this report for changed circumstances
- • Notify parties of new risks or vulnerabilities
- • Provide ongoing security assessments

10. Regulatory Considerations

Token regulations vary significantly by jurisdiction. This audit does not assess legal or regulatory compliance in any jurisdiction. Token holders and traders are responsible for:

- • Understanding applicable laws in their jurisdiction
- • Complying with tax obligations
- • Following securities regulations
- • Meeting KYC and AML requirements

11. Third-Party Information

This report may reference information from third-party sources (blockchain explorers, market data providers, etc.). Block Solutions has not independently verified all third-party information and makes no representations regarding its accuracy.

12. Intellectual Property

This report is the intellectual property of Block Solutions. It may be shared for verification purposes but may not be modified, misrepresented, or used in misleading ways without permission.

13. Professional Advice Recommendation

Before making any investment decisions related to Cowcoin or any cryptocurrency:

- • Consult with a qualified financial advisor
- • Speak with a legal professional about regulatory implications
- • Discuss tax consequences with a tax advisor
- • Ensure you fully understand the risks involved

14. DYOR - Do Your Own Research

This is a fundamental principle of cryptocurrency investment. Even with a positive audit report, investors must:

Smart Contract Code Review and Security Analysis Report for Cowcoin (XRPL) Token Smart Contract

- • Research the project thoroughly
- • Understand the technology
- • Evaluate the team and community
- • Assess market conditions
- • Consider their own risk tolerance
- • Make informed decisions based on multiple sources

15. Contact Information

For questions about this audit report or to request verification of its authenticity:
